DEMO: expected output — run in your Git Bash

Git Bash — MINGW64

```
$ cd /c/Users/Harshit/Desktop/Harshit-GLA-LibrarySystem
$ git switch main
Already on 'main'

$ git merge book-feature
Updating 7b42e91..4d8e2aa
Fast-forward
   src/book.txt | 4 ++++
   1 file changed, 4 insertions(+)

$ git switch -c library-update
Switched to a new branch 'library-update'

$ sed -i 's/Project Name:./Project Name: Digital Library Management System/' library_info.txt
$ git add library_info.txt
$ git commit -m "Update library project name"
[library-update 92f31bd] Update library project name
   1 file changed, 1 insertion(+), 1 deletion(-)

$ git switch main
Switched to branch 'main'
$ sed -i 's/Project Name:./Project Name: Online Library Management System v2/' library_info.txt
$ git add library_info.txt
$ git commit -m "Refine project name"
[main 5ce8120] Refine project name
   1 file changed, 1 insertion(+), 1 deletion(-)

$ git merge library-update
Auto-merging library_info.txt
CONFLICT (content): Merge conflict in library_info.txt
Automatic merge failed; fix conflicts and then commit the result.

$ git status
On branch main
You have unmerged paths.
```

DEMO: expected output — run in your Git Bash

```
$ cd /c/Users/Harshit/Desktop/Harshit-GLA-LibrarySystem
$ git branch book-feature
$ git switch book-feature
Switched to branch 'book-feature'

$ mkdir -p src
$ echo "Book Management Module" > src/book.txt
