

Application Build and Release Automation Lab Practice Exam 3

Student Name: Viyom Rana
Roll Number: 2415001904

Scenario

A software company named GLA Digital Solutions is developing an Online Library Management System. The development team uses Linux and Git to manage project files and collaborate on application features.

Task 1 — Project Workspace

6 Marks

Create:

- **<FirstName>-GLA-LibrarySystem**

Inside it create:

- src
- docs
- config
- backup

Create: **library_info.txt**, including:

- Name
- Roll Number
- Subject
- Project Name
- Semester

Demonstrate Linux commands for:

- pwd
- directory navigation
- listing files
- displaying file contents
- displaying directory structure

Answer

GNU nano 8.7.1

library_info.txt

Name: Viyom Rana

Roll Number: 2415001904

Subject: Automation Lab

Project Name: F1-Forecast

Semester: 5th

```

Task 2 — Git Repository

6 Marks

- Initialize Git.
- Configure Git username/email.
- Check status.
- Stage project files.
- Create the initial commit.
- Modify library_info.txt.
- Add a project objective and description.
- Check the changes.
- Stage the modified file.
- Create a second commit.
- Display commit history.

Answer

```
viyom@Viyom:~/Viyom-GLA-LibrarySystem$ git init
hint: Using 'master' as the name for the initial branch. This default br
hint: will change to "main" in Git 3.0. To configure the initial branch
hint: to use in all of your new repositories, which will suppress this w
hint: call:
hint:
hint:   git config --global init.defaultBranch <name>
hint: Names commonly chosen instead of 'master' are 'main', 'trunk' and
hint: 'development'. The just-created branch can be renamed via this com
mand:

Task 3 — Feature Branch

6 Marks

Develop a Book Management Module.

Create branch: **book-feature**

Inside src, create: **book.txt**, describing the Book Management Module and containing at least three features.

- Stage and commit the changes.

Demonstrate:

- branch creation
- branch switching
- current branch
- all branches
- returning to main

Answer

Book Management Module

Purpose:

The Book Management Module is used to manage books in the online library>

Features:

1. Add new books to the library.
2. Search and view available books.
3. Update book information.
4. Remove books from the library.

Expected Users:

Students, faculty, and library staff.

[book-feature 79b154f] Add book management module

1 file changed, 13 insertions(+)

create mode 100644 src/book.txt

```
viyom@Viyom:~/Viyom-GLA-LibrarySystem/src$ git log --oneline --all --decorate
```

Task 4 — Merge Conflict

8 Marks

Merge book-feature into main.

Create: **library-update**

- Modify the same line in library_info.txt in library-update.
- Commit the change.
- Modify that same line differently in main.
- Commit the change.
- Attempt the merge.
- Identify the conflict.
- Resolve it manually.
- Stage and commit the resolved file.
- Display the final file.
- Display Git status and history.

Answer

```

viyom@Viyom:~/Viyom-GLA-LibrarySystem/src$ git log --oneline --all --dec

Task 5 — Submission

4 Marks

Submit:

- Screenshots of important commands.
- Project directory.
- Git history.
- Branch information.
- Merge demonstration.
- Conflict and resolution demonstration.

Answer

```
ch
79b154f (book-feature) Add book management module
5dc4f08 Update library information
be11149 Add library system information
viyom@Viyom:~/Viyom-GLA-LibrarySystem/src$ git branch
